## INTRODUCTION

### NEW CLASSIFICATION OF IMPORTS AND EXPORTS.

With the present fiscal year, a new classification of the imports and exports of Canada is being adopted for the monthly and annual trade statistical reports of the Dominion Bureau of Statistics, the present report being the first to follow the new arrangement.

The number of items in the trade statistical classification has been considerably extended. A memorandum of suggested additions and revisions was prepared in the Bureau of Statistics, based upon the experience of the Bureau in answering trade inquiries, on the results of the annual Census of Industry recently instituted and on comparison of methods in other countries. The views of the larger trading and producing concerns throughout Canada were also obtained. This memorandum was laid before the Department of Customs, and, as a result of conferences which ensued, 86 items were added to the import classification and 88 to the export classification.

In the matter of the grouping of items, also, extensive alterations have been made. An adequate grouping of trade statistics should serve the two purposes of (1) enabling information to be supplied with the maximum of accuracy and convenience, and (2) enabling trade statistics to be readily collated with statistics of production, prices, labour, etc. The groupings employed in the past have involved certain inconsistencies through failure to follow a definite principle throughout. For example, the occurrence of the headings "Leather" and "Clothing" in the same category renders strict accuracy impossible, for an item like "Boots and Shoes" cannot be placed in the one without rendering the other defective. The matter was under consideration by an interdepartmental committee for some time during the past year, the broad conclusion reached being that for the detailed presentation of data, the principle of grouping by "Chief Component Material" should be followed, whilst a second grouping according to "Purpose" and a third according to "Source or Origin" (the Farm, the Forest, the Mine, etc.) should be constructed for use in analysis. Thus, the item "Boots and Shoes" is shown in the detailed presentation under "Leather," but the item is also included in a general analytical table under "Clothing," and also among products ultimately derived from "the Farm." Owing to the mixture in tariff items, the method cannot be universally applied, but it is felt that it can be made to effect improvements at many points over the methods previously in use.

The classification provides a primary division of Imports and Exports into ten main groups, viz.:—

1. Vegetable Products (except Chemicals, Fibres and Wood).
2. Animals and their Products (except Chemicals and Fibres).
3. Fibres, Textiles and Textile Products.
4. Wood, Wood Products and Paper.
5. Iron and its Products.
6. Non-Ferrous Metals and their Products.
7. Non-Metallic Minerals and their Products (except Chemicals).
8. Chemicals and Allied Products.
9. All Other Commodities.
10. Coin and Bullion.

Under these main groupings are various natural divisions and subdivisions designed to keep like articles together and to facilitate the making of group

totals. Certain of these groups are "purpose" classifications where this does not clash with the basic principle.

A complete index of every item and group of items will facilitate the use of the report.

The form of the Monthly Trade Report has also been altered. Several new tables, arranged in conformity with the new classification, are presented, while the main tables, giving the details of trade under each item, are re-arranged. The matter now reads lengthwise of the pages instead of "broadside" as heretofore. Figures denoting quantities are placed immediately above corresponding values, an arrangement that facilitates comparisons.

### EXPLANATORY NOTES.

---

In this report, throughout, the term "Imports" means "Imports for Consumption."

The term "Entered for Consumption" is the technical term in use at the custom-house, and does not imply that the goods have been actually consumed in Canada, but that they have passed into the possession of the importer and that duty has been paid on that portion liable for duty.

The value given for goods imported is the fair market value thereof when sold for home consumption in the principal markets of the country whence and at the time when the same were exported directly to Canada.

The term "Canadian Produce" includes all imported articles which have been changed in form or enhanced in value by further manufacture in Canada, such as sugar refined in Canada from imported raw sugar, flour ground from imported wheat, and articles constructed or manufactured from imported materials.

The term "Foreign Produce" applies to the exports of foreign goods which had been previously imported.

The value of "Canadian Produce" is its value at the time of exportation at the ports of Canada whence shipped.

The value of "Foreign Produce" is the actual cost of such goods.

In this report, the tables of imports and exports at the several ports of entry indicate that merchandise of the value stated was *entered inwards* or *passed outwards* at the ports mentioned, but do not imply that the imports were all for consumption at such ports or that the exports originated there.

The initials N.E.S. mean "not elsewhere specified."

The initials N.O.P. mean "not otherwise provided for."

The expression "Ton" means two thousand pounds, and "Cwt." one hundred pounds.
